"Highest in Customer Satisfaction with Dryers"

[Learn More](#)

Big time saver

Do laundry a little less often. With 7.3 cubic feet of capacity, this dryer handles really large loads. Saving you time and energy.

Open Up to Convenience

The dual-opening options of the LG EasyLoad™ door make loading and unloading the dryer easier than ever. Transferring wet clothes from the washer? Simply press the release button and pull the door down, hamper style to keep that stray sock from hitting the floor. Removing dry items? Swing the door to the side to clear the way for your basket below. Even tight spaces and challenging laundry-room layouts are no match for versatility like this.

SteamFresh™ Cycle

The quick fix

Late for the party and no time to iron your favorite outfit? The SteamFresh™ Cycle refreshes, and reduces wrinkles in up to five garments at a time with one 20-minute dryer cycle.

Wash the unwashable

You probably wish you could clean your throw pillows or children's toys. With the SteamSanitary™ Cycle, you can. It uses steam to safely sanitize items marked as non-washable.

Get wise

If you ever experience an issue with your LG dryer, you don't have to worry. The SmartDiagnosis™ feature helps the service center diagnose problems over the phone, or with a simple app on your smart phone, helping you minimize costly, inconvenient service calls.

Really dry clothes

What's worse than pulling clothes out of the dryer and finding they're still damp? Our Sensor Dry system measures the moisture levels during the cycle and automatically adjusts the drying time, to help ensure you get dry laundry every time.

LOVE THIS DRYER!

We bought this about 2 months ago and it has been great. I love all the settings, it dries fairly quickly, and the two door swing options are a great perk! Would definitely recommend this dryer to anyone with gas.

➕ **Pros:** ease of use, Performance

☑ **Yes,** I recommend this product.

COULD NOT BE HAPPIER

After much research we chose this dryer for various reasons. 1. LG is rated to have the lowest repair occurrences. 2. the door opening is large and the opening's edges are well constructed. We looked at another high-rated brand that looked similar, but when we opened the door, the opening was rather small and the metal edges flimsy. 3. The dual door (especially when you have trouble bending down) is an absolute plus. The dryers we looked at open to the site only. My previous 30-year-old dryer opened top to bottom. The chute prevents the laundry from landing on the floor while loading, no bending down required and the laundry basket is easily filled when the door opens to the side. It is also reversible. 4. Initially, we had purchased a less expensive LG dryer and were dissatisfied with the wrinkled clothes. We returned it and chose this dryer and are so glad we did. The laundry comes out fluffy and just a little warm. No need to iron most items, such as sheets and tablecloth. T-shirts are folded while slightly warm and are smooth and wrinkle free. The same with jeans. They come out perfect. I hardly use fabric softener anymore. 5. The many cycle settings are nice. For the most part I use the towel one and the majority of the laundry, sheets, t-shirts, cottons, I use the "bedding" setting. The normal setting runs a little longer, but I find it is not needed. My rugs will last longer because of the no heat setting. Some of the settings are static and can't be changed, some settings have dynamic options and can be tailored to your needs. 6. The absolute treasurer is the steam feature,

Quality

Features

Value

SWEEPSTAKES ENTRY RECEIVED

which I thought was just a gimmick and one I would not use much. But oh, how much I have benefited from it already. Here are some samples: 6a. Steam Sanitary: Stuffed animals, all my bed pillows and decorative pillows, my throws, my memory foam seat cushions, my comforters, my heating blankets, gym clothes, etc. - the results are incredible. Everything comes out fluffy, smelling fresh and clean. It won't remove tough stains, but minor things have been steamed away. 6b. The "Steam Fresh" feature I used to quickly rid some of my cloths of cooking odors and my dress pants and sweaters to freshen up. Wonderful. 7. The glass door is convenient. The dryer light comes on when the cycle has completed. The chimes are pleasant but hard to hear when you are in another room, maybe the electronic connection to your phone warns. I haven't had the need to try any more cycles that one can download, so we haven't tried that technology yet. 8. Controls: Even though the unit has a knob, the controls are actually digital. Still, I prefer turning knobs rather than pushing buttons. 9. Cycles: Some cycles are different only in the number of minutes they run, i.e. Bedding and Normal. Bedding is set about 10 min. less than Normal. I use the Bedding setting for most laundry (including jeans). The sensors do the rest. It all depends on how wet your laundry is. Since I use two spin cycles for heavier wash, i.e. towels, I never had to rerun the dryer cycle. The Permanent Press setting keeps my laundry wet enough so that I can hang them up for drip drying (without the dripping) The cold feature is great for rubber-backed rugs and the like. 10. Ergonomics: We are in our late 60s. Many of the new appliances have their function keys in the front panel above the door. I assume so that they can be stacked. We have room for side-by-side and we did not want to have to bent down each time we want to start the dryer. Additionally, the front-control dryers don't have a lip in the back. Meaning, there is the opportunity for things to fall off behind your appliances. We like the back panel controls, they are easy to see, control and manipulate and nothing slides off the back. This dryer cost a little more up front, but I am convinced it saves on many other purchases in the long-run. check with your Gas Company for rebate options as this dryer meets the energy efficient requirements. The only suggestion I would have for the manufacturer, LG, is to allow the complete cycle signal to be much louder or the option to send a message to a smart phone or other smart devise. Apparently the machine has the capability to download cycles, but I haven't figured out how to use that technology, or it is not available for use in the US.

DRYER IS EVERYTHING EXPECTED AND MORE

We bought this a few weeks ago at PC Richards, fantastic service from them, bought a floor model, however it was missing a hinge screw, and when I got the screw in, it is not the right size to repair it (works fine without it, but would rather it be done) great door feature that opens side to side AND top down for loading Dries great, no complaints at all

Highly recommend this product

✔ **Yes,** I recommend this product.

WHAT A TIME SAVER?!

SWEEPSTAKES ENTRY RECEIVED

I bought this product about a month ago. It is quiet and efficient and more importantly the days to getting up to check if clothes are dry are over. It will add time if clothes are still damp due to its Smart features and sensors on most loads. Love the variety and ease of use with controls for towels etc. I remove the clothes and always cooled down at end of cycle. No more hot burning hands when reaching in. Thank you LG for this superb dryer.

BEAUTIFUL BUT LACKS THE REAL WORKING.

I am an LG fan and I purchased this dryer because of it cycles and options. For any cycle there are two variables: temperature and how much to dry. The dryness can be substituted for timer. This one has the third variable - anti static and steam (both are same in terms of how it does). Let me narrate my experience which shows how useless this dryer is- 1. It fails to sense moisture - if the clothes are more wet they come out wet in any cycle. And if I put almost dry clothes, then if a cycle has chosen some time (say 40 minutes) it runs for full 40 minutes without considering the condition. 2. When I choose a cycle I am stuck with what ever temp and dryness level is preset for it. But the good news is that since I know the time it needs to dry, so I instead choose time dry with my needed setting. 3. When I choose anti-static option hoping that it will give some steam to release static, it refuses to respond to my button press, it makes an error sound. Hence the anti static option is for show only, no functionality behind the

Quality

Features

Value

SWEEPSTAKES ENTRY RECEIVED

Comment

button. 4. In all the cycles in the left side, it says it has a built in steam and moisture sensor - but as I wrote before it is for show and sales only, they both do not work. However there is one steam cycle, when I used it, I found that instead of steam it had water dripping of it through out and made the clothes wet. This dryer is in its warranty period, but I wonder all must be the same, changing the piece will not help. Thanks for reading my experience.

+ **Pros:** Style/Design

LG DRYER

It is a very nice dryer. I am still trying to figure out the drying times for some things. After getting a broken dryer (after already waiting a week for a new one!) I am happy with this dryer. Our original salesperson was wonderful.

+ **Pros:** Style/Design, Features/Settings

✔ Yes, I recommend this product.

WILL THIS WORK WITH PROPANE? IS THE CONVERSION ORIFICE INCLUDED IF NEEDED? IF NOT, WHAT ADDITIONAL PARTS WOULD I NEED TO BUY TO COMVERT THIS DRYER TO PROPANE?

1
answer

Answer this Question

LGJoel · 11 months ago

As shipped from the factory, the ENERGY STAR® Qualified LG 7.3 cu. ft. Ultra Large Capacity TurboSteam™ Gas Dryer with EasyLoad™ Door, Model # DLGX7601WE is configured for use with natural gas (NG) but it can be converted for use with LP (Liquefied Propane) gas. Gas pressure must not exceed 30-inches (33 cm) water column for LP. A qualified service technician or gas company technician must perform the conversion and the change should be noted on the dryer. The correct nozzle is Part # 383EEL3002D and the closest regional LG Authorized Parts Distributor to you that you can order it from is: Andrews Electronics

*LG received the highest numerical score among 10 Clothes Dryer brands in the J.D. Power 2017 Laundry Appliance Satisfaction Study, based on 6,241 total responses, measuring customer opinions about their new appliance purchased in the previous 12 months, surveyed February-March 2017. Your experiences may vary. Visit jdpower.com.

Think loading and unloading those mega-sized loads will leave you ready to throw in the towel? Think again—the flexible LG EasyLoad™ door opens hamper-style to load wet clothes, then swings to the side for easy unloading. Even heavyweight loads are no match for the 7.3 cu. ft. capacity, which handles a king-size comforter and a full set of bedding in a single load. And keep favorite clothes in tip-top shape with the new TurboSteam™ option that knocks out odors and reduces wrinkles and those annoying hanger bumps in just 10 minutes—right in the dryer.
