2. Introduction

This Turnigy TR800 is a high-definition video recorder with simple button operation or sound control, elegant design, small size, and is easy to carry. It is an essential utility in business, education, security, media, justice, tourism, health care, living and other field.

3. Operation Guide

1. Charge

The TR800 is powered by a built-in lithium rechargeable battery, so please charge it completely before using it the first time. The methods for charging follow:

1.) Computer: connect USB cable to the computer and the Mini DV, it will be charged automatically.

2.) Adaptor: connect USB cable to charger plug, then plug charger into electrical outlet, it will charge the Mini DV automatically.

When charging, the blue and red lights will light simultaneously, when charging is complete the red light will turn off and the TR800 will later enter the standby mode.

Notice: when battery power is too low, the TR800 will enter into protection mode, so it cannot be turn on until it is charged.

2. Power on to video

a. Press Power button slightly, the blue indicator light begins turns on and the TR800 enters into startup ready mode. The red light flashes rapidly to indicate that it is ready to record. It will enter standby mode within 45 seconds if no other controls are pressed.

b. Press Record/Stop (●/■) button slightly, the red indicator light immediately flashes quickly several times and then begins to record video, as indicated by a steadily flashing red light.

MINI DV will save file and turn off automatically as following:

- a. When you shoot video until the battery runs down.
- b. When the TR800 runs out of disk space.
- c. After 45 seconds in standby mode.

7. Connecting computer

The TR800 can be connected to a computer in power off mode, standby mode or video mode. Once connected can be accessed as a USB disk. You can then use your computer to copy, cut, paste and delete files.

When you connect it with through the USB port, a portable disk mark will be seen after several seconds.

Red indicator light always brights, yellow indicator light will be from flashed quickly to always brights.

Notice:

- a. When you connect computer, if the TR800 is not recognized within 30 seconds, please remove it and insert it again.
- b. It is better copy or cut video file into your computer hardware to play it. When a video file is played directly from the TR800 it will play unsmoothly, the reason is that large data files cannot be accessed synchronously.

8. PC Camera

When you first use the TR800 as a PC camera, please install driver. [The driver](#) name is SPCA1528_V2220_M...Setup.exe, it can be found in the attached CD. To install it, double click the driver document, and follow the instructions. After that there will be an AMCAP icon on the computer desktop.

Use USB cable to connect the TR800 to the computer, the mode is USB disk mode. Press the MODE button and the TR800 will switch into PC camera mode. Then double click on the AMCAP icon to use the TR800 as a PC camera.

9. Reset

If the TR800 begins to function in an abnormal manner or it hangs up, it will need to be reset. Use a thin object to press the Reset button, and then wait for the reset operation to complete.
